

I-5 BRIDGE LIFT STUDY

The 1997 I-5 Bridge Lift Study sponsored by Identity Clark County and Senator Slade Gorton, working with the Columbia River Towboat Association and the US Coast Guard, lead to a 50% reduction in bridge lifts. By creating an awareness of the increasing economic impact credited to a single bridge lift, by extending the hours of non-lift, and with the cooperation of the towboat owners, the number of bridge lifts has been reduced significantly. Copies of the report are available by e-mailing info@identityclarkcounty.org; or calling ICC at 360-695-4116.
